

GENERAL BUILDING INFORMATION

As a homeowner, it is always best to hire a licensed and insured builder, ask to see their current pocket license and the insurance company phone numbers of where they have liability coverage. Working with an unlicensed builder is done at your own risk!

If you sign a building permit application for a contractor or handyman, you are responsible for the entire project. **PLEASE PROTECT YOURSELF.**

All contractors offering to do work which totals \$600 or more for labor and materials must have a state license. A Residential Builders license allows a contractor to build a complete structure and also do maintenance or alteration (remodeling) work.

The Montmorency County House Numbering Ordinance was adopted on April 27, 1994 and shall take effect within sixty days after adoption. The Equalization Department shall assign and maintain address numbers to structures. **They may be contacted at 785-8046.**
